## The CoaguChek® XS System

### A smart way to test

The CoaguChek XS System uses exclusive smart technology to help ensure accurate results, offering the flexibility and control you need to confidently manage a wide range of anticoagulated patients.

#### Accurate and flexible technology

- Accurate, precise results in one minute with a fingerstick test
- The only system to perform onboard quality control and determine patient results in a single test chamber<sup>1,2</sup>
- Neutralizes therapeutic levels of heparin and LMWH<sup>3</sup>
- INR corrected for hematocrit within specified range – manage a broad array of patients with one device<sup>3</sup>

## HEMOSENSE INRATIO® PT MONITORING SYSTEM

On board quality controls. High and low control tests are performed in real time, side by side with the PT test, using the same drop of blood, ensuring the reliability of each and every test. No additional costly, time consuming external control tests or materials are recommended. Easy to use simple fingerstick test procedure. Self-maintaining system requires only routine cleaning, 3-button interface to change time, date, and access test memory. Unlike some other systems, use any lancet device to collect blood, and apply the one drop sample directly onto a test strip. Rapid test results in less than 2 minutes. Consistent, reliable results comparable to a central laboratory. Stores up to 60 results in memory. Powered by AC adapter or 4 AA batteries. Built in communication port for a printer.

## SIEMENS CLINITEK® URINE CHEMISTRY ANALYZER

Urinalysis has become an indispensable tool in healthcare. Provides important markers to detect early stages of many disease states, such as diabetes, kidney disease and urinary tract infections. Enhances disease monitoring and patient management. Semi-quantitative results have proven to be cost-effective and virtually immediate. In today's busy physician's office environment, interruptions are frequent and can contribute to timing errors and variability in results when urinalysis strips are read visually. Studies have shown that when urinalysis is performed with an instrument, sensitivity is increased and positives are correctly identified and reported.

## SIEMENS DCA VANTAGE™ ANALYZER

Optimal diabetes care: HbA1c and A:C Ratio testing results in just six and seven minutes, respectively. Increases patient comfort by requiring a smaller whole blood sample (1 uL) for HbA1c. Provides HbA1c patient trend graph. Online GFR calculator provides a tool for kidney disease staging. Improved clinical confidence: Proven to provide accurate and precise lab-quality results. Barcode patient data entry to reduce transcription errors. Enhanced productivity: Onboard printed results; eliminates transcription errors and saves time. Automatically uploads results to a LIS/HIS. Largest memory stores up to 4000 records; easily downloaded and transferred to a PC. Proven simplicity: Add sample to test cartridge, load, and walk away. No sample or reagent preparation. Color touch screen display; easier menu navigation, data entry and recall. Minimal maintenance required with automatic reminders.

## ABAXIS PICCOLO® XPRESS™ CHEMISTRY ANALYZER

Full automated system requires no special operating skills. 0.1cc whole blood, serum or plasma. Delivers multi-analyte panels including CLIA-waived lipids, liver enzymes and glucose monitoring. Self calibrates with every test run. Built-in iQC™ eliminates daily liquid control testing. Walk-away operation. Full-color touch screen with intuitive user interface. Results are provided in a "hard copy" self-adhesive report or can be quickly transferred to a data management system, enabling physicians to rapidly obtain critical diagnostic information at the point-of-care. Advanced technology ensures sound results. Centrifugal and capillary forces mix and dilute the reagents and sample in a self-contained, disposable reagent disc — lessening opportunities for procedural errors. Accuracy and precision comparable to large, more expensive laboratory analyzers. Built-in intelligent quality control (iQC™) meets CLIA and NCCLS guidelines. iQC™ system performs continuous quality control checks on every run. Every self-contained reagent disc is bar-coded for automatic self-calibration.

## ABAXIS REAGENTS DISCS

Single-use reagent discs make testing easy and reduce operator errors. Composed of three injection-molded plastic parts which are ultrasonically welded together and contain all the diluents and dry reagents necessary to perform a panel of tests. The layers form the cuvettes, chambers and passageways in which the fluids are processed. The top protective layer of the disc also provides bar-coded calibration information, the type of test panel, lot # and the expiration date; eliminating time-consuming, error-prone manual reagent calibrations and the possibility of using expired reagents.

## LW SCIENTIFIC REFRACTOMETER

Achieve accurate, quantitative measurements of specific gravity and protein determinations in bodily fluids. Simply read the numerical scales through the eyepiece. Rubber grip and optical focus system allow for easy viewing in any environment. Automatic temperature compensation allows for immediate results, even when sample temperatures vary.

RFT10-2 Refractometer

## ALLIED CLINICAL REFRACTOMETER

Provides rapid, accurate measurements of serum protein concentrate, urinary specific gravity, and refractive index of practically any other solution. A single drop is sufficient for determination. 6" x 1 1/2" x 1 1/4". Supplied in fitted case.

## KING UNIVERSAL COAGULATION REAGENTS

For BBL Fibrometer, Logos, Bio-Dynamics CA 600, MLA Electra 750, Roche Cobas Fibros and others. Liquid form. Working solution stability is 10 days to avoid waste.

51501 Partial Thromboplastin Time, 500 test/kit

## KING COAGULATION REAGENTS

Cost effective coagulation reagents dedicated to the BMC CU-500. Cuvettes included in 50-determination kits and also separately.

50500 Prothrombin Time, 500 test/kit

## KING BLOOD SPECIMEN TUBES

90001 Blood Specimen Tubes For Coagulation Analyzers, 50/bx

**SIMPOT DROPETTE® DISPOSABLE TRANSFER PIPETS**

These unbreakable all-in-one pipets eliminate the hazard of broken glass and exposure to infectious materials. Put an end to matching rubber bulbs with glass pipets. Molded from see-through low density polyethylene. Insert to biological fluids and most acids. The low-affinity surface reduces the loss of cells and valuable proteins due to binding. Can be sealed and refrigerated. Temperature resistant down to -196°C. Can be gas (EtO) sterilized.

P200-14	Graduated Pipet, 11.4cm Length, 1.5mL Capacity, Non-Sterile, 500/pk, 5000/cs

## MEDICAL ACTION INTAKE MEASURING CONTAINERS

Available in polystyrene or polypropylene, these 8 oz containers are ideal for measuring fluids. Each container is graduated in 10 cc (ml) and .25 oz increments up to 240 cc's.

02068A	Intake Measuring Container, Polypropylene, 500/cs
02069	Intake Measuring Container, Polystyrene, 500/cs

## MEDICAL ACTION TRIANGULAR MEASURE

Rigid-walled container with triangular shaped body. Large, easy-to-read graduations to 1000 cc's and 32 ozs. Frosted panel on one side for patient information. Rolled lip allows drip-free pouring. Disposable.

H970-00	Graduated Triangular Measuring Container, Polystyrene, 200/cs
H971-01	Triangular Measuring Container, Polypropylene, 200/cs

## PLASTI GRADUATE

Made of heavy wall polypropylene. Graduations clearly printed in black numbers. Graduated in both oz and cc. May be poured from any corner.

1150	Plasti Graduate, 200/cs

## POLAR WARE PLASTIC GRADUATED MEASURE

Reusable. Autoclavable.

PA-16	16 oz Graduated Measure, Translucent
-------	--------------------------------------

## TECH-MED GRADUATED BEAKERS

Stainless steelware is constructed without seams to prevent bacteria growth and to allow for easy cleaning.

4244	16 oz Beaker
4245	32 oz Beaker

## POLAR WARE GRADUATED MEASURES

Graduated in ounces and cc's. Measures have easy grip handles and large, smooth pouring spouts. Stainless steel.

T1062	16 oz, 3 3/4" x 4 5/8" Graduated Measure
T1063	32 oz, 4 3/4" x 5 1/4" Graduated Measure
T1064	64 oz, 5 1/2" x 6 1/2" Graduated Measure
T1065	5 Liter, 7" x 8 1/4" Graduated Measure

## POLAR WARE STORAGE CONTAINERS/BEAKERS & COVERS

Highly non-corrosive stainless steel can be safely heated. Smooth finish provides for easy cleaning. No pour spout.

## POLAR WARE STRAINERS

Heavy duty, 18-8 stainless steel mesh is used for its corrosion resistance and durability. Wooden handles reinforced with stainless steel rods resist cracking.

T1430	6" Double Mesh Strainer
T1431	8" Double Mesh Strainer
T1432	10 1/4" Double Mesh Strainer
T1532	10 1/4" Single Mesh Strainer

## BD FALCON™ CELL CULTURE FLASK

Vacuum-gas plasma tissue-culture treated polystyrene for uniform surface chemistry, cell attachment, spreading and growth. Vented cap incorporates a 0.2mm pore size hydrophobic membrane. Graduations, writing patch. Medical style, peel-open bags have convenient reseal tabs. Sterilized by gamma irradiation, nonpyrogenic.

353108	Flask, Cell Culture, 50mL, Tissue-Culture Treated Polystyrene, Canted Neck, Blue Vented Screw Cap, 20/bx, 5 bx/cs
353136	Flask, Cell Culture, 250mL, Tissue-Culture Treated Polystyrene, Blue Vented Screw Cap, 5/slv, 60/cs

1.1 mm I.D. x 75 mm lg.

40A502	Plain Capillary Tubes, Blue Coded, 100/vl, 12 vl/bx
40B501	Heparinized Capillary Tubes, Red Coded, 100/vl, 12 vl/bx
40C505	Heparinized Capillary Tubes, 60mm Calibration, 0.5mm I.D., 100/vl, 12 vl/bx

## CHASE SCIENTIFIC SEAL TUBE SEALER

Clay tube sealer compound for micro-hematocrit, natelson and caraway tubes.

43510	Seal Tube Sealer, 10 trays/pk, 10 pk/cs
-------	---

## STATSPIN SAFECRIT® CAPILLARY TUBES

100% plastic hematocrit tubes. Eliminates the risk of infectious disease transmitted by blood via broken glass. Available with heparin for "finger-stick" samples or untreated for anticoagulated venous samples. Tubes available in two lengths: 40mm and 75mm. The 40mm tubes are made for use with StatSpin centrifuges and the CritSpin hematocrit system. The 75mm tubes are for use in conventional centrifuges which support the full length of the tube.

HP4H-10	Capillary Tube, Plastic, 75mm, Sodium Heparin, 10 Vials of 100 (1000/cs)
HP4U-10	Capillary Tube, Plastic, 75mm, Untreated, 10 Vials of 100 (1000/cs)
HP8H-10	Capillary Tube, Plastic, 40mm For Use w/RH12 rotor, Sodium Heparin, 10 Vials of 100 (1000/cs)
HP8U-10	Capillary Tube, Plastic, 40mm For Use w/RH12 rotor, Untreated, 10 Vials of 100 (1000/cs)
HS24-10	Sealant Pads For Glass or Plastic, 10 pads/cs
HT9H-10	Capillary Tube, Glass, 40mm For Use w/RH12 rotor, Ammonium Heparin, 10 Vials of 100 (1000/cs)
HT9U-10	Capillary Tube, Glass, 40mm For Use w/RH12 rotor, Untreated, 10 Vials of 100 (1000/cs)

## ARKRAY ASSURE® LANCE LOCKOUT SAFETY LANCETS

Used by healthcare professionals to obtain capillary blood samples. Designed to help facilities meet OSHA requirements for needlestick safety. The needle is shielded before and after use. Also features an automatic lockout after use. This system helps protect healthcare professionals and patients from accidental needle stick injuries and cross-contamination.

980128	Lance, 28G x 1mm, Light Blue, 100/bx

## ARKRAY HAEMOLANCE® LANCETS

A safety lancet used by healthcare professionals to obtain a capillary blood sample. The sample is frequently used for monitoring blood glucose levels but can also be used for other in vitro diagnostic tests requiring capillary blood. Has a built-in needle protection system. The needle retracts automatically after use so the patient never actually sees the lancet during use. Helps protect patients and health care professionals from accidental punctures before and after use, minimizing the risk of cross-contamination.

## ARKRAY HAEMOLANCE PLUS® LANCETS

Help protect healthcare professionals and patients from accidental stick needle injuries and cross-contamination. Designed to meet OSHA requirements for needlestick safety. The needle is shielded prior to and after use. Features a automatic lockout after use. Its rapid needle retraction promotes patient comfort. Needle depth control offers consistent sampling results. Haemolance Plus Safety Lancets are available in 28, 25, 21, and 18 gauge formats and 1.2 and 1.6 blade depth.

990200	28ga MicroFlow Lancets, 1.6mm Depth, Light Blue, 150/bx

990950	25ga Low Flow Lancets, 1.4mm Depth, Blue, 50/bx

## ARKRAY SELECT LITE™ LANCING DEVICE

Small, spring-loaded pen device that is used with a standard lancet to obtain a capillary blood sample. It features an adjustable tip that allows you to choose from five settings for maximum comfort. It is compatible with most standard lancets.

660010	Lancing Device
660015	Lancing Device

## ARKRAY TECHLITE™ LANCETS

Sterile, disposable devices used to obtain a capillary blood sample. Compatible with most standard lancing devices. The lower gauge lancets work best on callused fingers where it is sometimes difficult to obtain a sample. The higher gauge lancets work best for individuals that lance their finger frequently or have thin skin (such as a child or elderly person).

## OWEN MUMFORD UNILET® BRAND LANCETS

Offers a complete range of needle sizes to ensure that accurate blood samples for all popular meters can be obtained with any skin type, quickly, easily and consistently. The specially shaped needles and choice of needle diameters enable users to obtain blood samples with minimum discomfort or tissue damage. This makes it easier to comply with the daily practice of blood glucose monitoring. Because Unilet® lancets are not device-specific, users are free to choose the gauge and shape of lancet best suited to them and their lancing device.

### OWEN MUMFORD UNISTIK® 2 SINGLE-USE CAPILLARY BLOOD SAMPLING DEVICES

To sample blood safely, simply and successfully, the Unistik® 2 range of single-use safety lancets comprises five versions, offering a variety of needle gauges and penetration depths to meet all your sampling requirements. All have the same unique single-use mechanism to avoid needle stick injuries and prevent cross-infection, and a side firing action to provide extra comfort for both patient and professional.

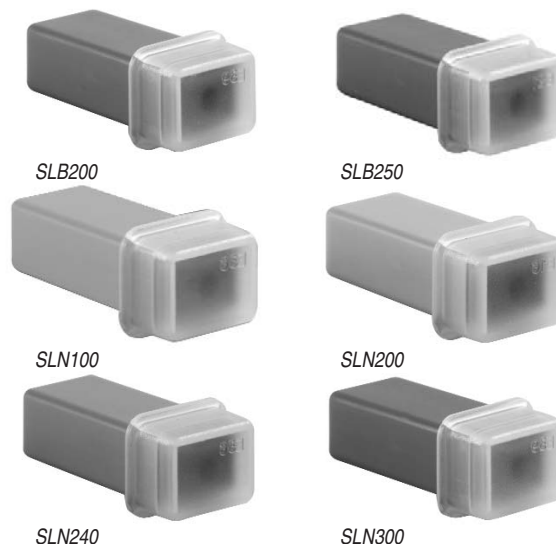

AT0700	Lancet, Normal, 21 ga, 2.4mm Penetration Depth, Yellow, 50/bx
AT0702	Lancet, Normal, 21ga, 2.4mm Penetration Depth, Yellow, 100/bx
AT0703	Lancet, Normal, 21ga, 2.4mm Penetration Depth, Yellow, 1000/cs
AT0704	Lancet, Normal, 21ga, 2.4mm Penetration Depth, Yellow, 200/bx
AT0710	Lancet, Extra, 21ga, 3.0mm Penetration Depth, Orange, 50/bx
AT0712	Lancet, Extra, 21ga, 3.0mm Penetration Depth, Orange, 100/bx
AT0713	Lancet, Extra, 21ga, 3.0mm Penetration Depth, Orange, 1000/cs
AT0714	Lancet, Extra, 21ga, 3.0mm Penetration Depth, Orange, 200/bx
AT0743	Lancet, Comfort, 28ga, 1.8mm Penetration Depth, Purple, 1000/cs
AT0752	Lancet, Super, 21ga, 3.0mm Penetration Depth, Burgundy, 100/bx

### OWEN MUMFORD UNISTIK® 3 PRE-SET SINGLE USE SAFETY LANCETS

Lancet is pre-set and does not require any cocking procedure. Just twist off the protective sterile cap and use. The needle point is hidden before use and automatically retracts after use to avoid accidental needle stick injuries and cross-infection. The unique, patented design features a side release button and pre-set lancet speed to ensure maximum comfort for the patient and the healthcare worker.

### MEDIPURPOSE - SURGILANCE SAFETY LANCETS

Innovative, patented design provides safe and easy micro sampling in low, medium and high blood flow. Color coded for depth of penetration and easy identification. High-speed penetration minimizes patient pain and clinician error. Needles or blades are OSHA compliant, fully concealed before and after use. Ideal for all POC tests requiring whole blood samples, including glucose, cholesterol, HIV and more. Latex-free and hypoallergenic. Safe. Simple. Effective.

SLB200	Blade, 1.8mm Depth, 75 to 100uL Blood Sample, Green, 100/bx
SLB250	Blade, 2.3mm Depth, 150 to 200uL Blood Sample, Blue, 100/bx
SLN100	Needle, 1.0mm Depth, 5 to 10uL Blood Sample, Yellow, 100/bx
SLN200	Needle, 1.8mm Depth, 10 to 20uL Blood Sample, Gray, 100/bx
SLN240	Needle, 2.2mm Depth, 20 to 40uL Blood Sample, Orange, 100/bx
SLN300	Needle, 2.8mm Depth, 40 to 60uL Blood Sample, Pink, 100/bx

### TERUMO CAPIJECT® SAFETY LANCETS

200101	Lancet 1.5mm Blade, 1.0 Depth, Pink, 200/bx, 10 bx/cs
200102	Lancet 1.5mm Blade, 1.5 Depth, Green, 200/bx, 10 bx/cs
200103	Lancet 1.5mm Blade, 2.0 Depth, Blue, 200/bx, 10 bx/cs

### HTL-STREFA MEDLANCE® PLUS EXTRA

Patient skin is tough? More blood is needed? Reach for the Medlance® Plus Extra and collect over 10uL.

7245	Lancet, 2.4mm Penetration Depth, Needle 21G, Color Coding Green, 100/bx

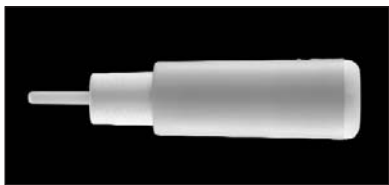

### HTL-STREFA MEDLANCE® PLUS LITE

Collecting blood has never been so painless! Ideal for blood glucose monitoring purposes.

7043	Lancet, 1.5mm Penetration Depth, Needle 25G, Color Coding Purple, 200/bx
7243	Lancet, 1.5mm Penetration Depth, Needle 25G, Color Coding Purple, 100/bx

# Blood Collection

## HTL-STREFA MEDLANCE® PLUS SPECIAL

Perfect for heel sticks on neonates and finger sticks on adults for high flow. Ultra sharp blade ensures adequate blood volume and quick healing.

- 7046 Blade 0.8mm, Penetration Depth 2.0mm, Color Coding Yellow, 200/bx
- 7246 Blade 0.8mm, Penetration Depth 2.0mm, Color Coding Yellow, 100/bx

## HTL-STREFA MEDLANCE® PLUS UNIVERSAL

Whenever you need larger blood samples for testing glucose, hemoglobin, cholesterol, blood type studies, coagulation, blood gas and many others.

- 7044 Lancet, 1.8mm Penetration Depth, Needle 21G, Color Coding Blue, 200/bx
- 7244 Lancet, 1.8mm Penetration Depth, Needle 21G, Color Coding Blue, 100/bx

## HTL-STREFA ACTI-LANCE SAFETY LANCET

Easy to handle: intuitive activation, how firing force, no lancet loading required, 2 step operation only. Minimized pain: ultra sharp and silicon coated needle, double spring mechanism to ensure high puncture speed and eliminate needle vibrations. Sufficient to lance once: different color-coded versions, right needle exposure length, adequate blood flow. Self-destructive mechanism excluding possibility of reuse, sterilized reliable sterility protector.

- 7141 Lite Safety Lancet, 28G Needle, 1.5mm Depth, Purple, 200/bx
- 7142 Lite Safety Lancet, 23G Needle, 1.8mm Depth, Blue, 200/bx
- 7143 Lite Safety Lancet, 17G Needle, 2.0mm Depth, Yellow, 200/bx

## SMITHS MEDICAL SAF-T-LANCE® PLUS SAFETY LANCETS

Provides retractable safety technology for capillary blood sampling. Automatic retraction reduces needlestick injuries and cross-contamination exposure while providing a quick, gentle puncture. The needle is shielded before and after use. Built-in needle depth control provides for consistent and accurate sampling results. Six different flow models provide flexibility for sampling applications. Proprietary spring action provides quick, gently puncture.

- 1005 Lancet, 1.5mm Blade Maximum Flow, Color Code Purple, 150/bx
- 1008 Lancet, 18G Needle, High Flow, Color Code yellow, 150/bx
- 1014 Lancet, 21G Needle, Normal Flow, Color Code Green, 150/bx
- 1020 Lancet, 28G Needle Micro Flow, Color Code Blue, 150/bx
- 1025 Lancet, 18G Needle High Flow, Color Code Light Blue, 150/bx
- 1028 Lancet, 1.5mm Blade Pediatric, Color Code Pink, 150/bx

## BD VACUTAINER® ACD GLASS TUBES

- 364012 Glass Tube w/conventional stopper, 10.25 x 64mm, 3.0mL, Yellow, Paper Label, ACD Solution B of Trisodium Citrate 10.2g/L, Citric Acid 4.8g/L & Dextrose 14.7g/L, 0.4mL, 100/bx, 10 bx/cs
- 364606 Glass Tube w/conventional stopper, 16 x 100mm, 8.5mL, Yellow, Paper Label, ACD Solution A of Trisodium Citrate 22.0g/L, Citric Acid 8.0g/L & Dextrose 24.5g/L, 1.5mL, 100/bx
- 364816 Glass Tube w/conventional stopper, 13 x 100mm, 3.0mL, Yellow, Paper Label, ACD Solution B of Trisodium Citrate 13.2g/L, Citric Acid 4.8g/L & Dextrose 14.7g/L, 1.0mL, 100/bx, 10 bx/cs

## BD VACUTAINER® EDTA GLASS TUBES

- 366450 Glass Tube w/conventional stopper, 13 x 100mm, 7.0mL, Lavender, Paper Label, K3EDTA 15%, Solution 0.081mL, 12.15mg, 100/pk

## BD VACUTAINER® PLUS PLASTIC BLOOD COLLECTION TUBES (CITRATE)

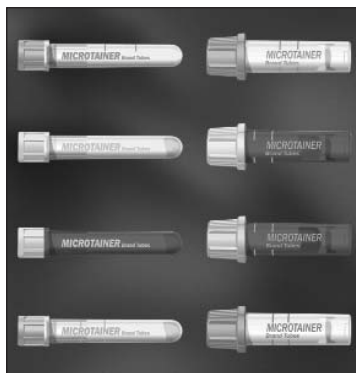

A safer method for blood collection. Plastic tubes reduce the risk of tube breakage and specimen spillage. Disposal of plastic tubes is safe, simple and in accordance with EPA guidelines. You can rely on BD for your plastic tube needs. We are the leader in blood collection tubes due to our superior quality, clinical expertise and support in addition to our compatibility with various automation systems.

- 366392 Glass Tube w/conventional stopper, 10.25 x 47mm, 1.8mL, Lt. Blue, Paper Label, Citrate Solution 0.2mL, 3.2% Sodium Citrate 4.94mg, Citric Acid 0.88mg, 100/bx, 10 bx/cs

## BD VACUTAINER® CITRATE PLUS PLASTIC TUBES

- 363080 Plastic Tube w/Hemogard™ closure, 13mm x 75mm, 1.8mL, Translucent Clear, Lt. Blue, Paper Label, 0.109 Molar/3.2% Sodium Citrate, 100/bx, 10 bx/cs
- 363083 Plastic Tube w/Hemogard™ closure, 13mm x 75mm, 2.7mL, Lt. Blue, Paper Label, 0.109 Molar/3.2% Sodium Citrate, 100/bx, 10 bx/cs

## BD MICROTAINER® BLOOD COLLECTION TUBES

Wide-mouth pathway of flo-top collector permits capillary blood to flow freely into tube, minimizing chance of premature clotting in collection top. The unique "twist-assist" MICROGARD™ closure significantly reduces blood splatter upon removal, in comparison with other tube closures. 200-400 microliter capacity. Made of break-resistant plastic.

- 365956 Tube, SST™, 50/bx, 4 bx/cs
- 365957 Tube, Serum w/no additive, 50/bx, 4 bx/cs
- 365958 Tube, PST™ w/lithium heparin, 50/bx, 4 bx/cs
- 365959 Tube, SST™ Amber, 50/bx, 4 bx/cs
- 365963 Tube, Serum w/Microgard™ closure, No additive, 50/bx, 4 bx/cs

## BD VACUTAINER® BLOOD TRANSFER DEVICE

The use of a syringe needle to transfer venous blood to a blood collection tube or blood culture bottle is both a dangerous procedure and an OSHA-prohibited practice. This device was designed with healthcare workers' safety in mind. This single-use device reduces the risk of transfer-related injuries while maintaining the specimen integrity required for accurate disease diagnosis.

## SMITHS MEDICAL SAF-T WING® BLOOD COLLECTION SETS

Handles delicate venous blood draws, utilizing a safety feature activated with a simple one- or two- handed technique. Available with or without pre-attached Saf-T Holder® device. Available with 21g, 23g, 25g needles and 6" and 12" tubing lengths. Available with Saf-T Holder® devices, which come with the back-end needle and Luer permanently attached to the holder to reduce potential exposures and holder re-use, compliant with OSHA directives. Clamp minimizes blood leakage from tubing upon disposal.

## STATSPIN STATSAMPLER® CAPILLARY TUBES

Unique "finger-stick" collection system utilizes a capillary tube for easy blood drawing; no "scopping" necessary. After draining into a microtube, blood is centrifuged and serum or plasma is easily removed. Chemistry-gel barrier between cells and plasma; no remixing of sample. 200uL volume yields approximately 120uL of serum or plasma with normal hematocrits.

## COOPERSURGICAL WARMGEL® INFANT HEEL WARMER

WarmGel® Infant Heel Warmer is a disposable heel warmer designed to provide gentle heat to increase blood flow and enhance infant blood sample collection. Patented WarmGel conforms to infant's foot. Provides consistent, uniform heat distribution. Stays in place.

20418 3" x 4", 100/cs

## COVIDIEN/KENDALL INFANT HEEL WARMER

Provides a fast, safe, and economical means to apply just the right amount of heat to infant's heel for blood sampling. Simply squeeze the pouch for instant activation. Heel warmer quickly reaches the proper temperature and maintains this temperature for several minutes. MH00002T has an adhesive tab for convenient attachment to the infant.

## SIMPORT 50ML DISPOSABLE CENTRIFUGE TUBES

Useful for collecting and transporting biological specimens. Leakproof characteristics are ensured by a flat top plastic screw cap with an inner sealing lip. Molded graduations from 2.5 to 50ml. Can be autoclaved and will resist temperatures up to 121°C. They will also resist acids, solvents and alkalis at room temperature. They withstand centrifugation speeds of 3000 g or 5000 RPM.

- T420-1 50mL Centrifuge Tube, Sterile, Polystyrene, Green Cap, 25/rack, 500/cs
- T420-3 50mL Centrifuge Tube, Sterile, Polypropylene, Green Cap, 25/rack, 500/cs
- T420-4 50mL Centrifuge Tube w/green cap, Sterile, Polypropylene, 25/bg, 20 bg/cs
- T420-5 50mL Centrifuge Tube, Non-Sterile, Polypropylene, Yellow Cap, 25/rack, 500/cs

- T420-7 50mL Centrifuge Tube, Non-Sterile, Polypropylene, Yellow Cap, 500/cs

## SIMPORT 50ML SAMPLE TUBES

Made of polypropylene. Conical bottom with self-standing base graduated from 10 to 50ml in 5ml increments. Chemically resistant and shatterproof. Supplied with a leakproof screw cap, particularly important when transporting hazardous material. Ideal for transport and storage of urine, sputum and most liquids or particulate samples. Molded-in graduations make them easy to read. Functional temperature range is -90°C to +121°C.

- C571-1 30mm x 115mm Sample Tube, Sterile, Green Cap, 25/bg, 20 bg/cs
- C571-2 30mm x 115mm Sample Tube, Non-Sterile, Yellow Cap, 100/bg, 5 bg/cs

- T408-2 15mL, Conical, 17 x 120 Polypropylene, Bulk Packaging, 1000/cs

## BD FALCON™ CONICAL CENTRIFUGE TUBES

Features two-color printing: dark blue graduations to help avoid eye strain and a large white writing patch to allow sample identification. For large fluid samples, use convenient 175ml and 225ml sizes. Made of durable polypropylene, these tubes allow for efficient, large-scale laboratory centrifugation.

## LW SCIENTIFIC M24 MICROHEMATOCRIT CENTRIFUGE

Designed for flexibility and easy of use in the laboratory or elsewhere. Spin hematocrits in less than five minutes at 11,000 rpm's. It has suction cups on the feet to hold it securely in place as well as a handy microhematocrit reader provided with every unit. Read the tubes directly on the rotor without picking them up.

- LWM24 M24 Hematocrit Centrifuge

## LW SCIENTIFIC ZIPOCRIT MICROHEMATOCRIT CENTRIFUGE

Saves valuable counter space and costs hundreds less than similar units. It can be used with normal line power or as a portable unit with 12V DC battery. 4-place for 75mm capillary tubes. Powered by a maintenance-free brushless motor. 11,000 rpm. Lightweight aluminum alloy construction.

- LWZIP2 Zipocrit Microhematocrit Centrifuge

**LW SCIENTIFIC ZIPSPIN MICROCENTRIFUGE**

Handy, fast, and versatile. Can be used with normal line power or as a portable unit with a 12V DC battery. 6-place rotor for 1.5 and 2ml microtubes. 12-place rotor for 0.5ml microtubes. Powered by a maintenance-free brushless motor. Variable speed. Metal alloy construction.

Accomplish both test tube and microhematocrit separations. Simply choose a box (with or without a digital tachometer) and choose your rotors. The Combo spins either test tubes, capillary tubes or microtubes by simply changing rotors - no tools required. Achieve hematocrit separations in less than five minutes at 12,000 rpm; then accurately determine results with the included reader disc. Other features include variable speed control, 30-minute timer, rubber feet, and all-metal body construction.

**LW SCIENTIFIC CENTRIFUGE**

The 8-place E8 is an economical fixed speed centrifuge designed to fit any budget. This unit accommodates most test tubes from 3ml - 15ml. The wide stance eliminates wobble, while the suction-cupped feet prevent slipping. The brushless motor (110V only) is virtually maintenance-free and the lid port allows easy viewing and tach-ing of specimens while in use.

LWE8F Economical Centrifuge, 8-Tube Fixed Speed

**LW SCIENTIFIC TEST TUBE CENTRIFUGE**

Horizontal separation advantages: tighter straight line get separations to reduce re-spins and re-mixes. Even more than that, it delivers 1800 G-Force for more complete separation of serum and plasma. Low maintenance features: self contained rotor, quiet operation, brushless no-maintenance motor, simple to operate, set the time and go.

LW-CXR Test Tube Centrifuge

**STATSPIN CENSLIDE® URINAYSIS SYSTEM**

A unique closed system for performing fast, clean, safe and accurate microscopic urinalysis. It is a microprocessor controlled to automatically spin CenSlide tubes at a preset speed for one minute. At the end of the cycle, the urine sediment is distributed evenly across the viewing area for microscopic analysis. It controls inherent variations in microscopic examination by standardizing urine sediment volume, centrifuge conditions and technique while significantly reducing total time for analysis.

## STATSPIN DIFFSPIN® 2 SLIDE SPINNER

For technique independent blood films. The modern alternative to wedge smears. It is a compact, quiet, easy to use slide spinner for the preparation of uniformly distributed cell monolayers for WBC differential analysis. Complete with a start-up supply of slides and slide holders, it safely prepares high quality technique independent monolayers. Benefits of spun slide preparations include: promotes even staining and easier counting, minimizes damage to WBC and improves RBS, morphology, streamlines workflow, takes only three seconds, simple clean safe procedure and patented slide holders contain excess blood.

**STATSPIN EXPRESS® 2 CENTRIFUGE**

This amazingly compact and quiet centrifuge spins standard 5mL blood collection tubes in only two minutes, yet it produces quality serum or plasma equal to 10-15 minute runs in larger, more costly equipment. Best of all, it is small and quiet enough to be used where it's needed most - right at the workstation. The two minute automatic cycle combined with rapid, gentle deceleration make it the most productive small centrifuge available. Tubes are processed as they arrive - no waiting for batches.

**STATSPIN EXPRESS® 3 CENTRIFUGE**

Provides faster turnaround time and greater productivity for your laboratory. With only three (3) settings, it is simple to use. Just select the 2, 3 or 5-minute button and press start. No fumbling with the settings or the need to readjust the speed. The unit beeps when it is done spinning. For safety, the lid remains locked until the rotor comes to a complete stop.

**STATSPIN MP® MULTIPURPOSE CENTRIFUGE**

A small, quiet, high-speed centrifuge. It employs a unique, proprietary drive and suspension system which results in nearly vibration-free operation. Lightweight, low mass rotors achieve both top speed and full breaking in a few seconds. Rotors can easily be changed with a simple push-on/pull-off; transforming the centrifuge from hematocrit to urine sediment or plasma.

## IRIS URINE STRIPS

Provides a rapid turnaround. Time delivers results in two minutes or less so patients can be tested and treated in one office visit. Increased accuracy in results interpretation is achieved through easy-to-read, flat laminated color comparison chart. Easier results recording is possible through coordinated reporting between test results pad and color chart. Ascorbic acid confirmation gives you greater confidence in detecting Vitamin C interference. Multiple test strip formats allow four different configurations designed specifically for individual testing needs.

800-7004	iChem™ Urine Strips, 10 SG, 100 strips/vial
800-7006	vChem™ Urine Strips, 10 SG, 100 strips/vial

## ARKRAY ASSURE 4 BLOOD GLUCOSE MONITORING SYSTEM

Easy, accurate and intuitive. A professional diabetes system for multi-resident use. Fast 10 second test time. Small 1.5uL sample size. AAA batteries. Large, easy-to-read display. Convenient, plasma referenced results. Quick code ship calibration. Easy access 50 test memory. Immediate on/off with test strip insertion. Intuition Guide-Me Curve™ Test Strips.

560001	Meter
560006	Control Solution Level 1 & 2, for Assure4
560050	Intuitive Guide-Me Curve™ Test Strips, 50 Count Plus the Code Chip
560100	Intuitive Guide-Me Curve™ Test Strips, 100 Count Plus the Code Chip

## ARKRAY ASSURE PRO BLOOD TESTING SYSTEM

Specifically designed for multi-resident use in long-term care (LTC) facilities. This full-featured system offers qProGuard™, the first of its kind, 24-hour reminder to conduct daily control solution testing as required in LTC settings. A "Hypo" warning alerts users of low blood glucose readings and four programmable alarms can be used as test reminders. Assure Pro Test Strips are built using platinum technology and requires a small blood sample size (1 µL). To test, simply insert the test strip in the convenient top-of-the-meter port. Results are displayed in 10 seconds on a large LCD and a backlight display (adjustable) assists for reading in low light conditions. A strip release button for strip disposal eliminates the need to touch a used strip, reducing the risk of exposure to infectious materials. For additional security, Assure Pro is designed with ProGrip™ to help secure a hold on the meter and reduce slipping on surfaces.

460001	Meter Only
460006	Control Solution (1 bottle ea Level I & II)
460050	Test Strips, Includes: 50 Strips & 1 Code Chip
460100	Test Strips, Includes: 100 Strips & 1 Code Chip

## ARKRAY ADVANCE INTUITION® BLOOD GLUCOSE MONITORING SYSTEM

The Advance Intuition® Blood Glucose Monitoring System is an intuitive solution that makes blood glucose monitoring easy. This basic meter has a large, easy to read display and a single button, which accesses the 10-test memory. Accurate results are displayed in only 10 seconds. Simple Guide-Me-Curve™ test strips are easy to handle and guide the finger to the application site.

420001	Basic Meter
420005	Control Solution, Normal
420050	Test Strips w/1 code ship, 50/bx
421100	Kit Includes: 1 Meter, 10 Test Strips, 10 Lancets, 1 Lancing Device, 1 Battery, 1 Normal Control Solution

## ARKRAY ADVANCE MICRO-DRAW® BLOOD GLUCOSE MONITORING SYSTEM

The Advance Micro-draw® Blood Glucose Monitoring System is a secure solution for diabetes management. Its unique design delivers advanced features and exceptional performance - all for an affordable price. With its small sample size requirement of 1.5 uL, blood glucose testing is more comfortable - smaller blood sample means less pain. Advance Micro-draw has a 250-test memory. Test results are stored with time and date stamp. Results can be downloaded to a PC for tracking of lifestyle trends and better diabetes management.

410005	Control Solution, Normal
410050	Test Strips w/1 code chip, 50/bx
410100	Test Strips w/1 code chip, 100/bx

## ARKRAY ASSURE® 3 BLOOD GLUCOSE MONITORING SYSTEM

Makes testing three times faster. Uses biosensor technology. Calibration is easy - simply insert the code chip and the meter is ready to test. Testing is easy - insert a test strip and the meter turns on. Apply sample and obtain plasma-referenced result in 10 seconds. Uses a specially designed test strip. The test strip has an ergonomic feel, and the Guide-Me Curve™ helps facilitate blood application. Capillary action wicks the sample into the test chamber. Features: uses only 3uL blood sample, automatic on/off with insertion and removal of test strip, and wide test range 30-550 mg/dL.

555001	Meter
555006	Assure 3 Control Solution Level 1&2
555008	Assure 3 Check Strip
555050	Assure 3 Test Strips w/code chip, 50/btl
555100	Assure 3 Test Strips w/code chip, 100/btl

## STANBIO RAPET® SEROLOGY TESTS - ASO

Latex agglutination slide test for the qualitative and semi-quantitative determination of antistreptolysin-O in non-diluted serum. "No dilution" technology eliminates the need to pre-dilute patient specimens. Color coded reagents and dropper caps help reduce the chance of errors. Positive and negative controls included. Easy to read results provided in 2 minutes.

- 1125-050 Antistreptolysin-O In Non-Diluted Serum, Results In 2 Minutes, 50 tests/kit  
1125-100 Antistreptolysin-O In Non-Diluted Serum, Results In 2 Minutes, 100 tests/kit

## STANBIO RAPET® SEROLOGY TESTS - CRP

Latex agglutination slide test for the qualitative and semi-quantitative determination of C-reactive protein in non-diluted serum. "No dilution" technology eliminates the need to pre-dilute patient specimens. Color coded reagents and dropper caps help reduce the chance of errors. Positive and negative controls included. Easy to read results provided in 2 minutes.

- 1130-050 C-Reactive Protein In Non-Diluted Serum, Results In 2 Minutes, 50 test/kit  
1130-100 C-Reactive Protein In Non-Diluted Serum, Results In 2 Minutes, 100 test/kit

## STANBIO RAPET® SEROLOGY TESTS - IM

Latex agglutination slide test for the qualitative and semi-quantitative determination of infectious mononucleosis in non-diluted serum or plasma. "No dilution" technology eliminates the need to pre-dilute patient specimens. Color coded reagents and dropper caps help reduce the chance of errors. Positive and negative controls included. Results in 3 minutes.

- 1145-050 Infectious Mononucleosis In Non-Diluted Serum Or Plasma, Results In 3 Minutes, 50 tests/kit

## STANBIO RAPET® SEROLOGY TESTS - RF

Latex agglutination slide test for the qualitative and semi-quantitative determination of rheumatoid factor in non-diluted serum or plasma. "No dilution" technology eliminates the need to pre-dilute patient specimens. Color coded reagents and dropper caps help reduce the chance of errors. Positive and negative controls included. Results in 2 minutes.

- 1155-050 Rheumatoid Factor In Non-Diluted Serum Or Plasma, Results In 2 Minutes, 50 tests/kit  
1155-100 Rheumatoid Factor In Non-Diluted Serum Or Plasma, Results In 2 Minutes, 100 tests/kit

## STANBIO RAPET® SEROLOGY TESTS - S-LE

Latex agglutination slide test for the qualitative and semi-quantitative determination of anti-DNP associated with systemic lupus erythematosus in human serum. "No dilution" technology eliminates the need to pre-dilute patient specimens. Color coded reagents and dropper caps help reduce the chance of errors. Positive and negative controls included.

- 1160-050 Anti-DNP Associated w/Systemic Lupus Erythematosus In Human Serum, Results In 3 Minutes, 50 tests/kit

## STANBIO RPR QUICKTEST

Carbon flocculation slide test for the qualitative and quantitative determination of reagin antibodies associated with syphilis in serum or plasma. Reactive, weakly reactive and non-reactive controls included. Color coded reagents and dropper caps help reduce the chance of errors. Complete test kits includes pipettes/stirrers, dispensing needle, dispensing bottle and 18mm circle test cards. Results in 8 minutes.

- 1170-100 RPR QuickTest (Reagin Antibodies Associated w/Syphilis), 100 test/kit
- 1170-500 Syphilis In Serum Or Plasma, Results in 8 Minutes, 500 test/kit

## STANBIO STAT-SITE M® HEMOGLOBIN SYSTEM

Battery operated, completely portable analyzer that fits in the palm of your hand. With a single drop of fingerstick, the STAT-Site® M Hemoglobin System provides precise hemoglobin analysis in seconds.

- 503000 Hemoglobin Controls 6 x 1.5ml (3 low & 3 high level), 1/set
- 900900 Meter w/operating manual & battery
- 900900SP Starter Pack, Includes: 1 ea STAT-Site® M Hgb Meter 900900; 3 ea STAT-Site® M Hgb Test Card Boxes (100 tests/bx) 901025; & 1 ea STAT-Site® Hemoglobin Controls (6 x 1.5mL) 503000
- 901025 100 Test Cards (4 pkg of 25) w/a lot-specific code key
- Accessories**
- 202012 12uL Transfer Tubes. Optional Accessory For Use With 901025, Used To Collect Blood Sample & Apply To Test Card, 100 tubes/bg
- 900905 Battery Pack, 3 Volt CR 2032 Lithium Ion Battery (coin type), Each Battery Good For Approximately 1000 Tests, 5/pk

## SIMPORT AMPLATE™ 384 - WELL THIN-WALLED PCR PLATES

Made of polypropylene. Developed for high volume laboratory work. It is precision-molded to ensure well-to-well and plate-to-plate uniformity. Each well has a 40ul capacity that can be used with reaction volumes from 2 to 30ul. All wells on the plate are thin-walled to make sure that an efficient and fast heat transfer is occurring. Although it has 384 wells, it can be filled using automated fluid handling systems or standard multichannel pipettors. There are no cylindrical walls extending above the plate. Skirted to allow bar coding on sides for identification and also to make it compatible with automated fluid handling systems. Holes on sides allow for precise and accurate plate positioning and removal. An alphanumeric grid helps in locating the sample. One corner of the plate is cut away to facilitate its orientation. Autoclavable. Packed in tamperproof resealable bags.

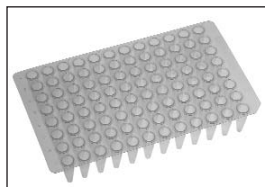

- T323-384SKB Blue 384 Thin Walled PCR Plate, 10/bg, 10 bg/cs
- T323-384SKG Green 384 Thin Walled PCR Plate, 10/bg, 10 bg/cs
- T323-384SKN Natural 384 Thin Walled PCR Plate, 10/bg, 10 bg/cs
- T323-384SKR Pink 384 Thin Walled PCR Plate, 10/bg, 10 bg/cs
- T323-384SKY Yellow 384 Thin Walled PCR Plate, 10/bg, 10 bg/cs

## COVIDIEN/KENDALL LABORATORY PUMP TUBING

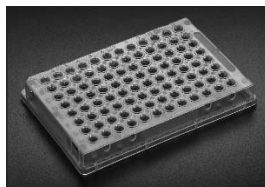

Laboratory grade BUBBLE tubing. Tapered bubbles every 36" may be cut to form appropriate size female or male connector end. Uniform wall thickness and a smooth, nonporous, nonwetting surface. Conductive type meets N.F.P.A. specifications for use with flammable gas agents. Clear, flexible polyvinyl chloride formulation is nontoxic, highly stable, chemically resistant, and autoclavable. Goes on and stays on most size barbed connections.

- 8888280214 Non-Conductive type, Pump Tubing, 3/16" x 100', 100' coil, 1/cs
- 8888280412 Non-Conductive type, Pump Tubing, 1/4" x 100', 100' coil/cs

## SIMPOT AMPLATE™ 96 - WELL THIN-WALLED PCR PLATES

Made of polypropylene. Thin-walled and designed for rapid thermal transfer. The skirt around the plate provides a bar coding and labeling area. They are precision-molded to ensure well-to-well and plate-to-plate uniformity. Quite superior to polycarbonate plates, they are impermeable to water vapor. All sealing methods can be used for oil-free operation. Each well has a volume of 100µl. An alphanumeric grid helps sample identification. To facilitate orientation, the top left corner of the plate is cut away. Easy to seal since no cylindrical walls extend above the plate.

## SIMPOT AMPLITUDE™ PCR REACTION STRIPS

Made of polypropylene. Integral 0.2ml tubes with ultrathin sidewalls and bottoms for more uniform and efficient temperature transfer, therefore reducing PCR reaction time in most 96-well "V" bottomed thermal cyclers. They are more easily handled than single tubes. They will precisely fit standard well spacing. Caps also sold separately.

### SIMPORT AMPLITUBE™ PCR REACTION TUBES

Designed for oil-free operation, these tubes are made of transparent superior quality grade polypropylene for better viewing of the contents. Their ultrathin wall design will ensure rapid thermal transfer and a significant reduction in cycle and PCR reaction time. Attached hinged caps and can be used with heated lids used by thermal cycler manufacturers. They provide positive sealing during thermal cycling and will prevent evaporation while being easily opened and closed with one hand. Frosted writing surface for sample identification. Packaged in tamperproof resealable safety-lock bags.

**SIMPORT BIOTUBE™ FOOTPRINT RACKS**

Designed in such a way that the 96-place rack, having a standard on-center spacing of tubes, also has a standard microtiter sized footprint. This rack is therefore suitable for use with robotics systems and for transferring liquids with multichannel pipettors and autosampling devices that conform to 96-well microplate systems. The same alphanumeric identification is used on the cover and white base. Ideal for HTLV-III testing, bacterial and hybridoma cell uptake studies, cell harvesting, pharmaceutical quality control, receptor binding assays, RIA and EIA.

- T101-1 Rack w/96 plain individual tubes, Non-Sterile, 10/cs
- T101-2 Rack w/96 plain individual tubes, Sterile, 10/cs
- T101-3 Rack w/12 strips of 8 tubes, Non-Sterile, 10/cs

- F490-4 65mm Funnel, Polypropylene, 100/cs

**SIMPORT BIOTUBE™ RACKS**

Made of polypropylene. Standard 96-well on center spacing of tubes offers a color coding system using colored interchangeable plastic grids. These are used as a support for the 1.2ml tubes. This unique grid stands on four legs and can be removed from the base of the box and placed on a lab counter as a self-standing support. It can also be placed in a refrigerator or freezer shelf for improved air circulation around tubes, or in a water bath to allow controlled warming of the tubes and their contents. Easy to read numbers and letters used on the box cover for sample identification are also shown on the support grids.

## SIMPOT BIOTUBE™ STORAGE RACKS

Compatible with most robotic workstations, this polypropylene storage rack can be used with most cell harvesters and leading 8- and 12-channel pipettors. It contains 96 removable polypropylene square tubes in a 8 x 12 configuration, each having a 2.1ml capacity (2ml when capped). Although the tubes are square, the bottom is round to facilitate emptying. For procedures requiring a low surface tension such as protein and nucleic acid work, a special tube (T105-20LST) has been developed using a type of polypropylene specifically designed to avoid potentially harmful lubricants (such as silicone) while minimizing liquid retention. The autoclavable rack and tubes are ideal for storage of blood and other biological samples at temperatures, from -30°C for freezer storage, up to 70°C. Tubes are available separately. A PVC cover is also supplied for full protection of tube contents. Racks are stackable to save on storage space.

T105-20	2.1mL Square Tubes Only, Non-Sterile, 4800/cs
T105-20LST	2.1mL Low Surface Tension Square Tubes Only, Non-Sterile, 4800/cs

## SIMPOT BIOTUBE™ TUBES

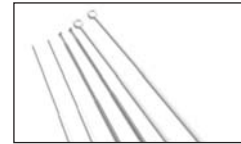

Made of autoclavable polypropylene. Caps are made of polyethylene and are not autoclavable. Tubes have a gross volume of 1.2ml but with a cap in place, they will hold 1.1ml. Ideal for HTLV-III testing, bacterial and hybridoma cell uptake studies, cell harvesting, pharmaceutical quality control, receptor binding assays, RIA and EIA.

## SIMPOT INO-LOOP™ INOCULATING LOOP & NEEDLE

Made of high impact polystyrene. Smooth and flexible to facilitate uniform streaking without damaging the gel surface. Needle is straight and suitable for removal of specimens of single colonies. Packed sterile in safe, tamperproof, zip-seal resealable bags. Does not require flaming and thus eliminate the risk of infection due to aerosol formation of pathogenic substances. Cross contamination due to improper sterilization is eliminated. They can be used under hoods without danger, and are color-coded for ease of size identification. 22.7cm length.

**SIMPORT SECURESEAL™ ADHESIVE FILM**

Reduces sample-to-sample or well-to-well contamination and/or spill over. Has the differential advantage of perforated end tabs and a multiple split backing which allow for easier and more accurate positioning and more secure sealing. The polyester based film with acrylic adhesive is inert and thus compatible with almost all microplate procedures. The functional temperature range of the product is -70° to +100°C. Less than .001% moisture permeable under high humidity conditions and less than .01% oxygen permeable. DMSO resistant.

T329-4 Sterile Adhesive Film, 100/pk, 10 pk/cs

**PARKER LABS AQUAFLEX® ULTRASOUND GEL PAD**

Aqueous, flexible, disposable ultrasound standoff for use in difficult to visualize and near field area, or when gels alone won't do. Disposability eliminates the risk of cross contamination in diagnostic and therapeutic ultrasound procedures. Requires no gel, except in prolonged procedures. Requires only gentle, even pressure. Disposable. Cushions sensitive areas. Hypoallergenic, bacteriostatic.

04-02 2 cm x 9 cm Ultrasound Gel Pad, 6 pd/bx, 6 bx/cs

**GRAHAM PROFESSIONAL LABMATES® SPILL SOAKER**

Single-use solution for a variety of lab settings. ChannelLoc™ design grabs and disperses spills. Quickly absorbs up to 750 ml/sq meter. Airlaid top layer cushions breakable items when dropped or tipped over. Can be used as baby scale liner and animal cage liners.

**HCPRO BLOODBORNE PATHOGENS TRAINING VIDEO**

The 20-minute video meets OSHA requirements for training employees on the bloodborne pathogens standard. It discusses: CDC guidelines and OSHA regulations on hepatitis B vaccinations; hepatitis B, hepatitis C, and HIV transmission protection; universal precautions; exposure control plan management; post exposure prophylaxis; infection control; engineering and work practice controls; personal protective equipment; and housekeeping standards.

VBBPTDVD Training Video, DVD

**HCPRO HAZARD COMMUNICATION TRAINING VIDEO**

The 25-minute video meets OSHA requirements for training employees on the hazard communication standard. It includes topics on material safety data sheets (MSDSs), labeling requirements, hazardous chemicals and drugs, personal protective equipment, spill clean-up procedures, eyewash stations and fire prevention. To facilitate training, pre- and post-viewing test questions and answers are included.

VHCSTDVD Training Video, DVD

**HCPRO HEALTHCARE ERGONOMICS TRAINING VIDEO**

Infection and contamination aren't the only workplace hazards threatening your staff. Everyday work habits, when executed improperly, can have long-term effects on the health and safety of your employees, from clinical workers to office personnel. This brand new training video instructs office and clinical workers in ambulatory care on the benefits of ergonomics and workplace awareness. In less than half an hour, your staff will also learn valuable information on common musculoskeletal disorders, such as carpal tunnel syndrome, and injuries from assisting or lifting patients.

**HCPRO LAB SAFETY MADE SIMPLE**

Laboratory directors face increasing pressure from OSHA, the Joint Commission, COLA, and CAP to train frontline staff on safety compliance every year. Safety compliance training not only fulfills annual regulatory requirements, but also helps to maintain a safe work environment, protect your facility's bottom line, and avoid fines or fees from major regulators.

LSTMS Book

**HCPRO NEEDLESTICK PREVENTION TRAINING VIDEO**

Prevent needlesticks and avoid the stressful consequences. Needle and sharp injuries pose the most serious threat to healthcare workers. Occupational blood exposures increase the risk of life-threatening infections and add immense psychological burdens. And they are expensive, not only for treating employees, but also for employers through post-exposure follow-up, lost productivity, and even OSHA violations.

**SIMPORT SECURESEAL™ ALUMINUM SEALING FOIL**

This type of material is ideal for manual sealing during PCR work and also for high throughput applications. Adhesive backing makes it easy to apply. Will resist temperatures from -86°C to +130°C. Pierceable with a pipet tip for easy access to sample. DMSO resistant. No heat sealer needed.

T329-5 Aluminum Sealing Foil, 100 sheets/pk

## SIMPOT SECURESEAL™ THERMAL ADHESIVE SEALING FILM

This transparent sealing tape consists of a 2.0 mil polyolefin film coated on one side with a pressure sensitive acrylate adhesive which does not interfere with cycle reactions. Ideal for reducing well-to-well contamination and/or spill over in sensitive PCR applications where the minimization of evaporation and vapor loss is critical. Not only does it offer low-autofluorescence but it will prevent vapor loss and is thermostable and functional from -70°C to +100°C. Manufactured RNase, DNase and DNA-free. DMSO resistant.

### LW SCIENTIFIC M1 PLUS BINOCULAR UNIVERSITY MICROSCOPE

The M1 Plus microscope looks equally at home in a laboratory setting or an AP Biology classroom. The seidentopf binocular head, built-in mechanical stage, coaxial coarse and fine focus controls and reverse nosepiece are premium features normally found on much more expensive medical microscopes. All these features have been designed onto large stable frame for durability and years of use.

### LW SCIENTIFIC M5 LAB MICROSCOPE

Built to withstand the rigors of daily laboratory use in the pathology, hematology, cytology, and microbiology lab. The five-position nosepiece allows for specialized objectives, including 50X oil Plan, 60X high dry Plan, 2X Plan, and phase contrast objectives. The oversized 10X/20 high point Plan eyepieces combined with Infinity Plan or DIN Plan objectives offer high resolution flat-field imaging over a larger specimen area. The M Series was designed for comfort and ease of operation, with all controls located ergonomically within a finger's reach. The M5 sets a new laboratory standard in microscopy.

## LW SCIENTIFIC PARAGON FLEX ARM STEREO MICROSCOPE

Exceeds the performance demands of dental, industrial, and laboratory technicians. The stand has spring-loaded hinge joints with friction adjustments to hold any position, and can be easily rotated 360° when not in use. Mount it with the C-clamp, or screw it directly onto the counter top. The wide-field, dual-magnification optics offer high resolution and clarity across a broad field of view. The 1/2x supplementary lens doubles your field of view, expands your magnification options and extends your working distance to over 5" for hands-under work space. The 10W variable fluorescent ring light gives 360° of shadow-free illumination.

Connect the camera to your trinocular microscope with a C- or CS-mount or use the included macro lens and eyepiece adapter to work with a variety of optical equipment. The BioVID camera will connect over the eyepiece of any monocular or binocular microscope for live video microscopy. Optometrists and Ophthalmologists can connect the BioVID directly to their slit lamps for prediagnostic exams. The BioVID is an excellent tool for demonstrations in medical, laboratory, and industrial inspection applications.

## LW SCIENTIFIC FLUORESCENT & LED ILLUMINATORS

Economical fluorescent and LED ring lights offer shadow-free cold illumination with super long-life bulbs at a reduced cost. Long thumb screws allow for easy attachment to almost any brand of microscope with mounting rings from 35mm up to 59mm. Mounting rings are available for all stereoscopes. The newly-designed fluorescent ring light features variable intensity for precise lighting control in any environment. The LED model combines the near intensity of fiber optics with the affordability of most fluorescent models. Thirty-six white LED bulbs, rated for 10,000 hours of life, create intense, focused, shadow-free illumination for the demanding inspection technician.

**MEDICAL ACTION STARPLEX® COLLECTION & TRANSPORT SWAB SYSTEMS**

Each system consists of a round bottom tube containing transport media with a rayon tipped swab, plastic shaft or wire shafted swab secured by a cap and is then packaged in a pouch and sterilized. Modified Amies Gel without charcoal provides excellent survival for a wide range of bacteria and is recommended for use with gram stain. Shelf life is 24 months. Modified Amies Charcoal Gel provides excellent survival for a wide range of bacteria including fastidious organisms such as *Neisseria gonorrhea*. Shelf life is 24 months. Modified Liquid Stuart's provides excellent recovery in routine bacteriology and is recommended for use with the gram stain and rapid screening methods. Shelf life is 18 months. The Anaerobic Transport System is a self-container, sterile, ready-to-use system which includes a glass tube containing a semi-solid, pre-reduced transport medium. It is intended for maintaining the viability of a wide variety of micro-organisms during transportation for up to 48 hours. The system has an indicator that will turn lavender if the anaerobic condition is compromised. Shelf life is 18 months.

## MEDICAL ACTION URIAID™ URINE COLLECTION KIT

Designed especially for women. A single use, contoured plastic funnel that screws onto the sterile leak-resistant specimen container included with this kit. The unique inner funnel design helps direct urine into the container without contaminating the container once the funnel is removed. Effective when assisting children, the elderly, the infirm and during pregnancy when mobility can be difficult. Eliminates spillage and contamination to the patient's hand, container and surroundings. Eliminates the need to transfer sample from urinal to specimen container. Once the cap is correctly screwed onto the specimen container, the seal is leak resistant. Kit contains: (1) sterile specimen container with lid and label, (1) funnel, (1) BZK towlette.

**SIMPORT CRYOVIAL® VIALS**

Made of polypropylene. Designed for storing biological material, human or animal cells, at temperatures as low as -196°C but should be used only in the gas phase of liquid nitrogen. The cap features a long skirt for one hand aseptic methods, a super fast thread design that allows tightening or removal with a mere 1 1/4 turn, and an inside thread design that will not contribute to possible contamination. Tubes are provided with a white marking area for sample identification.

**SIMPORT DISPOSABLE CULTURE TUBES**

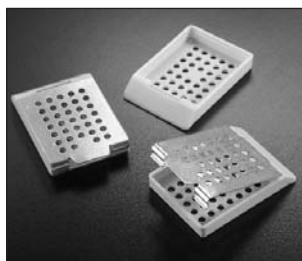

Ideal for use in bacteriology, RIA, coagulation and other routine laboratory procedures. There are no mold release agents that could cause errors and interferences in RIA tests. Precision molding with virgin thermoplastics ensures that our tubes are uniform in size and shape as well as being chemically clean and ready to use.

## SIMPORT EMBEDDING CASSETTES

Suitable for holding and identifying tissue samples in processing, embedding, and sectioning procedures. Fits securely in microtome chuck adapters. They are molded from a high density polymer that is totally resistant to the chemical action of histological solvents. Designed to accept standard metal lids and will keep specimens in complete safety during processing. The slanted writing surface accepts markings easily, permitting sample identification throughout all stages of embedding and long afterwards when in archives. M480-1 is made of polypropylene; all others are made of acetal polymer.

## SIMPORT HISTOSETTE® I TISSUE PROCESSING/EMBEDDING CASSETTES

Made of acetal polymer. Holds tissue specimen during the embedding process, as well as in a storage file. Molded from a special high density polymer. Keeps specimens safely submerged in liquid and are totally resistant to the chemical action of histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. Just snap apart and conveniently lock the lid into the base of the cassette. They can be opened or closed as often as necessary and they always relock securely without danger of specimen loss. Large labeling areas are located on three sides. Anterior writing area at a 30° angle.

### SIMPORT MICREWUBE® TUBES WITH LIP SEAL SCREW CAP & ATTACHMENT LOOP

The flexible sealing lip inside the cap ensures a positive leakproof seal under even the most adverse conditions. This deep internal lip fits snugly against the interior wall of the tube preventing the contents from coming in contact with the threads, thus reducing the chances of sample contamination. Caps are supplied with attachment loops in order to prevent contamination and mix-up. Cannot be autoclaved since closure is made of high density polyethylene. Can be centrifuged up to 17,000g.

### SIMPORT HISTOSETTE® II TISSUE PROCESSING/EMBEDDING CASSETTES

Made of acetal polymer. Disposable plastic cassettes that hold tissue specimens during processing and embedding, as well as in storage. Molded from a special high-density polymer, these patented cassettes keep specimens safely submerged in liquid and are totally resistant to the chemical action of histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. They can be opened and closed as often as necessary and will always relock securely without danger of specimen loss. Large labeling areas are located on three sides of the cassettes for your convenience. Available in non-cytotoxic, non-metallic colors. The anterior writing area is slanted at a 45° angle to make the cassette more suitable to be used with certain types of cassette labeling instruments.

### SIMPORT MICREWUBE® TUBES WITH O-RING SEAL SCREW CAP

Made of polypropylene. The O-Ring secured in the top of the cap ensures a positive leakproof seal, time after time, keeping the integrity of small samples under even the most adverse conditions. The caps do not have the attachment loops for users who prefer to remove the caps completely from the tubes when filling or sampling. Perfect for cryogenic work. Can be centrifuged up to 17,000g. Will withstand temperatures from -196°C to +121°C.

### SIMPORT SCINTILLATION VIALS

Made of polypropylene. This shoulderless vial features a full width opening of 23mm for ease of access, a high degree of resistance to organic solvents, and sufficient translucence so that reagent levels or the presence of filter paper can be easily detected. The unique thread design of the closure allows the vial to be sealed, and opened with an easy 1/4 turn. The quality of the sealing system is such that it is not necessary to tighten the closure with a lost of pressure to achieve a leakproof seal. Polyethylene closure.

S220	20mL Scintillation Vial, Bulk, 500/cs
S220-1	20mL Scintillation Vial, 100/tray, 5 tray/cs

### SIMPORT PLASTIC SAMPLE TUBES SCREW CAPS

Caps are available either with or without a silicone washer between the cap and the tube to ensure a positive leakproof seal at all temperatures. As for tubes, these closures are also made of polypropylene, providing the same coefficient of expansion for both, which further enhances the leakproof qualities of the vials at changing temperatures. The cap features a long skirt and a super-fast thread design that allows it to be removed or sealed with a single turn.

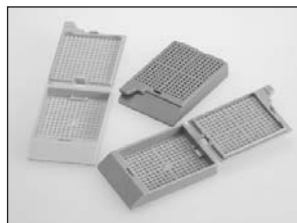

T502N	Cap Only w/silicone washer, Natural Color, Non-Sterile, 1000/cs

## SIMPORT SNAPTWIST® SCINTILLATION VIALS

Can be used for liquid scintillation counting, gamma counting, chromatography, sample storage and culturing. It will fit very nicely into the LKB and Packard Varisette counters. The shoulderless vial features a full width opening of 12.5mm and the overall dimensions are 16 x 57mm. The closures are made of high-flow polypropylene and are a true time saver. The vials can be securely sealed by simply snapping the caps on; removal of caps requires an easy 1/4 turn (twist). The ease with which these caps can be manipulated eliminates the danger of spillage associated with other push-on/pull-off caps. A built-in positive lock prevents the cap from popping off because of a small build-up of pressure in the vial.

## SIMPORT PLASTIC SAMPLE TUBES WITH EXTERNAL THREADS

Designed for the storage and transportation of biological material. Manufactured from non-toxic polypropylene, the tube provides strength and clarity and exhibits some unique design features. The vial has external threads, providing a smooth and uniform inner surface, thus reducing the risk of contamination. Tubes can be autoclaved (121°C) in upright position with caps loosened. These leakproof tubes are tested with silicone washer screw caps at 20PSI. Available either plain or with printed graduations and white marking area. Order caps separately.
