DESERT ASSEMBLY OPTI-KLENS I EMERGENCY EYEWASH

Chrome-plated, solid brass eyewash unit easily installs on any existing sink or basin faucet as a permanent eye wash fountain with unlimited water supply in an emergency, unlike portable models. In operation, unit mounts behind the spout, where it remains out of the way for every day use. In an emergency, it frees both hands to hold eyes open to the flow of water. Delivering more than twice the required water flow, it does so at a reasonable height. It will function properly with as little as 15 lbs. of water pressure. It is restricted to reduce high water pressure to a velocity low enough not to be injurious to the user. No plumbing required. Two of the most common adapters are packed with the unit. Other adapters are available from manufacturer. Meets ANSI Standard #Z358.1-1998 for an eyewash unit. The addition of the Eliminator Valve allows water temperature to be pre-set at the faucet and remain on. You now have a dedicated eyewash station with only tepid water available. For sink use, the water flow is activated by the use of the push through plunger on the Eliminator Valve. The faucet handles will no longer be used after the water temperature is set. Push the plunger to the opposite side for water flow.

DESERT ASSEMBLY OPTI-KLENS II EMERGENCY FACE & EYEWASH

Chrome-plated, solid brass face & eyewash unit is designed to fit most standard faucets as a permanent face wash & eyewash fountain with unlimited water supply in an emergency. In operation, unit mounts to the spout with two spray nozzles curving upwards. In an emergency, it frees both hands to hold eyes open to the flow of water. Delivering more than 3 gallons of water per minute, it does so at a reasonable height. No plumbing required. Two of the most common adapters are packed with the unit. Other adapters are available from manufacturer. Meets ANSI Standard #Z358.1-1998 for an eyewash unit. The addition of the Eliminator Valve allows water temperature to be pre-set at the faucet and remain on. You now have a dedicated face wash & eyewash station with only cold water available. For sink use, the water flow is activated by the use of the push through plunger on the Eliminator Valve. Push the plunger to the opposite side for water flow.

DESERT ASSEMBLY OPTI-KLENS II LABORATORY FACE & EYEWASH

Chrome-plated, solid brass face & eyewash unit is designed to fit laboratory gooseneck faucets as a permanent face wash & eyewash fountain with unlimited water supply in an emergency. In operation, unit mounts to the spout with two spray nozzles curving upwards with a 15 degree greater angle than the standard OK-II model. In an emergency, it frees both hands to hold eyes open to the flow of water. Delivering more than 3 gallons of water per minute, it does so at a reasonable height. No plumbing required. Two of the most common adapters are packed with the unit. Other adapters are available from manufacturer. Meets ANSI Standard #Z358.1-1998 for an eyewash unit. The addition of the Eliminator Valve allows water temperature to be pre-set at the faucet and remain on. You now have a dedicated face wash & eyewash station with only cold water available. For sink use, the water flow is activated by the use of the push through plunger on the Eliminator Valve. Push the plunger to the opposite side for water flow.

DESERT ASSEMBLY OPTI-KLENS WALL MOUNTED EYEWASH

Wall-Mounted Emergency Eyewash Fountain. This model meets the needs of facilities without close access to standard sinks where a face & eyewash station is required. This face & eyewash fountain provides all of the safety features and regulatory requirements of all Opti-Klens face & eyewash fountains, but gives the customer an alternative to sink-installed units.

SmartCompliance™

The innovative SmartCompliance Program redefines business first aid. Three powerful components work together to create the most comprehensive solution available today:

Innovative Cabinet Design

This unique cabinet design eliminates disorganized and missing supplies. Clearly labeled compartments create a cabinet that is easy to use and restock. With the expansion pocket, you can customize your cabinet to meet your specific needs.

SmartTab ezRefill System

This simple but effective system for reordering and restocking revolutionizes replenishment. It is quick, easy, and cost effective. As supplies are used, SmartTab ezRefill reminder tabs notify you when it is time to reorder supplies and puts reorder information at your fingertips.

Guaranteed OSHA Compliance

SmartCompliance is the only first aid solution that guarantees OSHA compliance. This is the first product that goes beyond supplies and provides peace of mind. Simply register your cabinet and use the SmartTab ezRefill System to maintain the guarantee. Additionally, should OSHA regulations change for your industry, the product will be made available to ensure compliance.

Patent Pending for SmartTab™ Indicator System
and SmartCompliance™ regulation compliance monitoring system.

MOLDEX HANDYSTRAP® N95 RESPIRATORS

Comes with buckle and allows mask to comfortably hang around the user's neck when not in use - preventing premature disposable and saving money. Elastic cloth strap is cool and comfortable against the skin. Ventex® valve lets the hot air out faster, so workers breathe easier and stay cooler and helps the masks last longer. Soft form nose cushion for added comfort. Cost savings - workers use fewer masks because the mask hangs around their neck when they're not using it.

COVIDIEN/KENDALL SOLIDIFICATION PRODUCTS

Use of our solidifiers insures compliance with DOT Regulation DOT-E 10821. OSHA recommends that all possible precautions are to be taken to protect healthcare workers from direct exposure to infectious liquids. Our solidifiers are designed to absorb and encapsulate blood, vomit, or any fluid with at least 6% water content. Premisorb, Premisorb 2 and KWIK-SORB are solidifiers only. PremiCide solidifies and sanitizes liquid medical waste with Glutaraldehyde for disposal in the "white bag" system as non-infectious solid waste. 10K multi-dose bottle has pointed top opening to fit easily into a suction canister's port; bottle graduations are imprinted on side. Each graduation will solidify up to 1000cc's of fluid.

HCPRO PERSONAL PROTECTIVE EQUIPMENT TRAINING VIDEO

You are required to train your staff members, whose primary means of protection from exposure is personal protective equipment (PPE), to comply with OSHA bloodborne pathogens standard. Finding the time and energy to create this training is a challenge for safety officers. This video is a first of its kind that addresses the steps employees need to take to protect themselves and others from exposure to infectious materials. The video explains employee and employer responsibilities as they relate to OSHA's occupational safety and health controls.

HCPRO INFECTION CONTROL FOR NURSING HOMES

It's one of the biggest challenges your facility faces: Under F-Tag #441, nursing homes must "establish and maintain an infection control program designed to provide a safe, sanitary, and comfortable environment and to help prevent the development and transmission of disease and infection." With residents frail and at a greater risk for infections such as MSRA, c. difficile, urinary tract infections (UTI), and, according to the CDC, pandemic flu virus, an effective infection control program is crucial — yet nursing homes often lack the resources to identify and control infection.

HCPRO LONG-TERM CARE POCKET GUIDE TO NURSING DOCUMENTATION

Documentation is one of the most time-consuming — and confusing — tasks for the nurses in your facility. But this documentation is critically tied to your residents' quality of care, your documentation and most importantly — your reimbursement. This pocket guide will provide long-term care nurses with the most critical, need-to-know information about documentation. With this guide, you can feel confident that your nurses' documentation contains all of the necessary components for reimbursement and regulatory requirements. It will help speed up the documentation process, saving your nurses valuable time — and saving you money. It will reduce documentation errors, help documentation stand up to survey scrutiny and help create more lawsuit-proof documentation record.

HCPRO THE MDS COORDINATOR'S FIELD GUIDE

Skilled nursing facilities continue to struggle with the completion and submission of the minimum data set (MDS). And it is up to the MDS coordinators to not only complete the MDS but also to interact effectively with nursing home staff regarding the resident assessment instrument (RAI) in order to obtain reimbursement for the facility's services. Not an easy task.

HCPRO/QUALITY AMERICA OSHA ANNUAL RETRAINING PROGRAM - WHATS MY FINE?

This lively, game show-style program includes ten short scenes that depict daily operations at a clinic in Anytown, USA. In each scenario healthcare workers make various mistakes that are violations of OSHA Standards. Your staff identify these issues and note them in their workbook (provided on the included CD). Next, the host comes on screen and points out each item that was done incorrectly and discusses the right way to do it. Finally, fines for non-compliance are assigned to each mistake.
